Work Experience

Software Engineer **Lennections Inc. (Atlanta, GA - Remote)** **Feb. 2023 - Present**

Software engineer, technology manager and team lead for a company developing software for the education sector. These responsibilities included:

- Developing new features and enhancements for the current codebase
- Introducing new libraries, technology and systems to the application
- Database management, fixing bugs, communicating with clients, supporting and maintaining the application
- Managing small teach of developers including setting tasks, helping grow their coding skills and code reviews

Software Engineer **Frontera Software (Austin, TX - Remote)** **May 2021 - Jan. 2023**

Engineering, building, and maintaining software that managed union members. Including over 15 "locals" with hundreds of thousands of members and many more records. These projects were developed and maintained using Docker, AWS, Vue.js and MongoDB.

Software Developer **Studio Flight (OKC, OK - Hybrid)** **May 2019 - May 2021**

Full-Stack web developer at a small, start-up organization. Responsibilities include overseeing and developing project's lifecycles, building web applications from design files, managing designer expectations, UX needs and consistency, implementing best practice DevOps, client communication, SEO, general agency/marketing technology knowledge and organization flow.

Software Developer **StapleGun (OKC, OK)** **Dec. 2016 - May 2019**

Ad agency web developer working with designers and dev team to build responsive and interactive websites. Clients included companies from all sizes and focuses from Fortune 500 oil companies to modern art museums to small boutique coffee shops and everything in between. Responsibilities included building web applications from scratch based on designs, working with designers, sitting in client meetings and responsive communication with all members of the team, company-wide. Craft CMS, Wordpress, HTML5, CSS3, SCSS, JavaScript, jQuery, Node, NPM, Composer, PHP, Wix.

Software Developer **Phase 2 (OKC, OK)** **Jan 2016 - Dec. 2016**

Support Developer, devops - Helping support developers on their projects and working on internal projects (Ruby, .NET, Node, Javascript, HTML5, CSS3). Positions also included monitoring web servers and hosting logs (New Relic, DataDog, Heroku) as well as client support and communication (email, calls, Skype, screen-shares, etc.).

Freelance Web Developer **Seattle/OKC** **July 2015 - Jan. 2019**

Freelancing for a variety of clients in Seattle after my developer course, including Hammerquist Studios. Developing band and bar websites for friends and acquaintances in Oklahoma City including Tallows, The Bread and Butter Band, Twiggs, and the Red Brick Bar. Accomplish whatever is assigned by the hiring company or individuals: plan, design, build.

Education

General Assembly **Seattle, WA** **Mar. 2015 - June 2015**

Over a 12-week course, I devoted 12-hour days and 70+ hour weeks to learning the MEAN stack and becoming a web developer. During the course of the program, I developed numerous web applications from scratch using a variety of technologies. These web applications (including a platformer game) were all managed with GIT and deployed to live as a live site.

University of Oklahoma **Norman, OK** **2009-2014**

Major: B.A. in Entrepreneurship and New Venture Management
Minor: in Non-profit Organization Studies
